Summary

- Full-Stack Developer with expertise in **Microservices and the MERN stack** (MongoDB, Express.js, React.js, Node.js).
- Designed and deployed scalable applications using **Docker, Redis, Nginx, and Kafka**.
- Delivered **5+ production-grade applications** featuring real-time functionality and AI integrations.
- Built **secure, high-performance platforms** across healthcare, e-learning, and e-commerce domains.

Technical Skills

- **Languages:** Java, Python (DSA), JavaScript, HTML, CSS
- **Databases:** MySQL, MongoDB, Redis
- **Frameworks & Tools:** Node.js, Express.js, React.js, Kafka, REST APIs, SDLC, EJS, Socket.IO, Postman, Git, GitHub
- **APIs:** Geo Location API, Generative AI APIs
- **DevOps:** Docker, Nginx, CI/CD, Render, AWS (EC2, S3, Lambda, IAM, RDS)

Education

- **Master of Computer Applications (MCA)** – PR Pote Patil College of Engineering, Amravati |
Oct 2024 – Present
Focus: Full-Stack Development, AI Integration
- **Bachelor of Computer Applications (BCA)** – Sant Gadge Baba Amravati University |
Jul 2021 – Jul 2024
CGPA: 7.9 / 10; College Topper for 3 Years

Experience

Cloud Intern – AWS Academy | Oct 2024 – Dec 2024 | [Certificate](#)

- Designed and deployed **3+ cloud-based solutions** by integrating EC2, S3, IAM, RDS, and Lambda, improving scalability and reliability.
- Automated CI/CD workflows that accelerated deployment pipelines by 15% and improved release frequency.

Projects

E-Commerce – Microservices Platform | [GitHub](#)

- Built a scalable e-commerce platform using microservices (Auth, Users, Items, Orders) with **JWT authentication, Redis caching, and Nginx gateway**, improving **API response times by 35%** and ensuring **secure request handling**.
- Deployed containerized services with **Docker and MongoDB**, enabling **independent deployments**, increasing **system uptime to 99.9%**, and enhancing **fault tolerance** across services
- **Tech Stack:** Node.js, Express.js, MongoDB, Redis, Nginx, Docker

Am Well – Virtual Healthcare Assistant | [GitHub](#) | [Demo](#)

- Engineered secure RESTful APIs for patient data, ambulance tracking, and chatbot integration, processing up to 500+ concurrent requests with <200ms response time.
- **Tech Stack:** Node.js, Express.js, MongoDB, Socket.IO, Geo Location API, GenAI API

Student-Hub – Campus Collaboration Platform | [GitHub](#) | [Demo](#)

- Created a full-stack **MERN application** for centralized access to courses, resources, and announcements, increasing **student engagement by 20%**.
- Developed a **role-based Admin Panel** for content and user management, reducing **manual administrative effort by 30%**.
- Designed **RESTful APIs** with secure authentication and optimized MongoDB schemas, improving **data retrieval speed by 25%**.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, REST APIs, JWT, Git/GitHub

Certifications & Leadership

- **5-Star Gold Badge in Python** – [Hacker Rank](#), Top 5% Globally, Issued: May 2025
- **Winner, College Hackathon** – For a web-based medical emergency solution, reducing simulated response time by 25% | Apr 2025
- **Business Director** – **Directed** the Skill Sphere Program by JCI, enrolling 150+ students and forming partnerships with 5+ departments, increasing cross-campus engagement by 40% | Jan 2025 – Present
- **Vice President**, College Association Committee; **Secretary**, BCA Department Student Council
Led 10+ events with 500+ attendees, achieving a 90% average satisfaction score | Aug 2022 – May 2024
